MOSQUITO PROGRAM 2014

The Mosquito Control Program for 2014 has begun for the City of College Park. The program consists of larviciding, surveillance, and possible spraying in the areas where mosquitoes occur. Known breeding areas in the community will be checked by Maryland Department of Agriculture (MDA) personnel for the presence of larvae and may be treated if necessary. Spraying, to control flying adults, also performed by MDA, may occur if count thresholds are met at the time of scheduled applications.

Residents are strongly urged to eliminate any standing water on their property or treat it with a larvicide. The Asian Tiger mosquito (ATM) is active during the day and can breed in a very small amount of standing water. Inspect your yard for water-holding containers including tires, buckets, and flower pots and dispose of them or store them upside down. Corrugated drain pipes fitted to gutters are often a perfect place for mosquitoes to breed! Be aware that the spraying conducted by MDA has very little effect on adult ATMs as they are not active during the time of day spraying occurs. The best way to combat the ATM is to remove standing water in your yard, and to ask your neighbors to do the same.

Prevent mosquito breeding by changing water weekly in bird baths, wading pools and pet dishes. Gutters should be cleaned at least twice a year. Adult mosquito surveillance by MDA personnel will begin in June, and spraying may occur on Wednesday nights if the spray criteria are met. Report mosquito problems, spray requests, and spray objections to Public Works at 240-487-3590.
