Mayor Essay

If I were Mayor, I would have a community day. It would have food, drinks and games. I would like to do this because our community needs to stay connected. Also, we need to stay a peaceful community. This is important to me because I have noticed our community is falling apart and getting less peaceful. Our community needs to stay connected and peaceful. Plus I want to keep our peaceful and connected community.

I would encourage businesses by asking to donate money for community day. They could advertise their business products at community day. They could give away free goods at community day. They could buy a bounce house for community day and give out food.

I could encourage residents by giving them a chance to talk to friends. They can eat with relatives. You could have a day with your family and you could let your friends meet your family.

I would encourage town officials by giving them a good review. I would recommend them to someone else. I would give them new safety gear. I would give them new tools.

I would get the word out by making flyers. I would get the word out by making posters. I would get the word out by knocking on doors and telling them about it. I would make banners about it.
